## CAMILLE BAUER

Rely on us.

- System state monitoring: class 0.2
- All-purpose:VII, P/Q/S, f, PF etc.
- Remote communication via Modbus
- DM5S: Energy metering class 0.5S
- DM5F: Response time 15...25ms
- Configuration even without power supply

## SINEAX DM5S/DM5F <br> Programmable premium class heavy current transducers

## DM5S/DM5F - The next transducer generation

SINEAX DM5S and SINEAX DM5F are free-programmable universal measurement devices for heavy-current systems: Classical high-accuracy transducer, suited for monitoring tasks and retrofit applications in energy distribution and industry.
The devices can be adapted fast and easily to the measurement task by means of the CB-Manager software - even if there is no power supply available. Depending on the device version measured quantities can be mapped proportionally to analog DC current outputs or to Modbus.

The measurement is done uninterrupted in all four quadrants and can be adapted optimally to the system to be monitored. Both the average time of the measurement and the expected maximum signal level can be configured.
Commissioning is very easy and is supported by means of service functions, such as nameplate printing, connection check, measurement acquisition as well as simulation and trimming of the analog outputs.

| Device version | SINEAX DM5S | SINEAX DM5F |
| :--- | :--- | :--- |
| Measurement time, programmable | $4 \ldots 1024$ cycles | $1 / 2,1 / 2(1), 1,2,4,8$ cycles |
| Fastes response time (at 50Hz) | $85 \ldots 165 \mathrm{~ms}$ | $15 \ldots 25 \mathrm{~ms}$ |
| Energy metering | max. 32 meters | not supported |
| Auto-scaling V/I inputs | supported | not supported |

## System state monitoring in class $\mathbf{0 . 2}$

These instantaneous values will be calculated in regular configurable intervals and provided to analog outputs and Modbus interface.

14 = Single phase system or 4 -wire balanced or
3 -wire unbalanced phase shift
$\mathbf{2 L}=$ two-phase system (split phase)
3G $=3$-wire balanced
$3 \mathbf{U}=3$-wire unbalanced
3A $=3$-wire unbalanced in Aron connection
$\mathbf{4 U}=4$-wire unbalanced
$40=4$-wire unbalanced in Open- $Y$ connection

The DM5S supports up to 32 energy meters. To each of these meters a base measurement quantity and a tariff can be assigned. The present tariff is set via Modbus.
For application with short measurement times, e.g. energy consumption for a single working day or production lot, the resolution can be adapted.
Thanks to uninterrupted measurement and automatic range detection a high accuracy is achieved.

- Up to 32 meters
- Up to 16 tariffs (Control via Modbus)
- Free selectable base quantity (P, Q, S, I)
- High accuracy 0.5S
- Uninterrupted measurement
- Free selectable meter resolution

## Free device assembly

For parameterization the DM5 is equipped with a USB interface as a standard.
The measurement output can be performed via analog outputs and / or a Modbus interface.

## DM5x-

For the designation of the device the marking of the Power LED can be overwritten with the device description. The associated label can then be printed.

## Parameterization, service and measurement acquisition

The CB-Manager software provides the following functions to the user:

- Full parameterization of DM5S/DM5F
- Locally: Via USB interface (even without power supply)
- Remote: Via Modbus interface
- OFFLINE: No device connected
- Data label printing of present parameterization
- Free selectable LED marking
- Acquisition and recording of measured quantities
- Check of proper device connection
- Archiving of configuration and measurement files
- Setting or resetting of meter contents
- Simulation and trimming of analog outputs
- Comprehensive parameterization help

A security system can be activated to restrict the access to device data.

## Configuration interface USB

| Physics: | USB, max. 3 m |
| :--- | :--- |
| Connection: | Socket USB-B |
| Device class: | Human interface device (HID) |

## Measurement uncertainty

Reference conditions:
(acc. IEC/EN 60688)
Voltage, current:
Power:
Power factor:
Frequency:
Ambient $23^{\circ} \mathrm{C} \pm 1 \mathrm{~K}$, sinusoidal, $\mathrm{PF}=1$,
Frequency $50 \ldots 60 \mathrm{~Hz}$, burden $250 \Omega$, Measurement over 8 cycles (DM5S), 1 cycle (DM5F) $\pm 0.15 \%$ FSU / FSI ${ }^{11}{ }^{2)}$
$\pm 0.2 \%\left(\right.$ FSU x FSI) ${ }^{2)}$
$\pm 0.1^{\circ}$ )
Active energy (DM5S only): Class 0.5S, EN 62 053-22
Reactive energy (DM5S only): Class 2, EN 62 053-23

1) FSU / FSI - Configured maximum value of voltage / current inputs
${ }^{2)}$ Additional uncertainty if neutral wire not connected (3-wire connections)

- Voltage, power: $0.1 \%$ of measurement value; Load factor: $0.1^{\circ}$
- Energy: Voltage influence $\times 2$, angle uncertainty $\times 2$

## Safety

Current inputs are galvanically isolated from each other.
Protection class:
Pollution degree:
Protection rating:
Overvoltage category:

II (protective insulation, voltage inputs via protective impedance)
2
IP30 (housing), IP20 (terminals)
CAT III up to 600V

## Ambient conditions, general information

Operating temperature: $\quad-10$ up to 22 up to 24 up to $+55^{\circ} \mathrm{C}$
Storage temperature: $\quad-25$ up to $+70^{\circ} \mathrm{C}$
Temperature influence: $\quad 0.5 \times$ measurement uncertainty per 10 K
Long term drift: $\quad 0.5 \times$ measurement uncertainty per year
Others:
Relative humidity: -
Altitude: $\leq 2000 \mathrm{~m}$ max.
Device to be used indoor only!
Mechanical attributes
Dimensions ( $\mathrm{H} \times \mathrm{B} \times \mathrm{D}$ ): Orientation:
Housing material:
Weight:
Flammability class:
$110 \times 70 \times 70 \mathrm{~mm}$
Any
Polycarbonat
500 g
V-0 acc. UL94, self-extinguishing, non dripping, free of halogen

## Order code

SINEAX DM5S, programmable, up to 4 analog outputs, USB, Modbus/RTU, meters SINEAX DM5F, programmable, $1 / 2$ cycle measurement, up to 4 analog outputs, USB, Modbus/RTU
